

NewieVentures offers a range of engineering skills, specialising in electronics and embedded software design. Our success is due to exceptional communication, a dedication to innovation, and customer-centric development.

# We're Hiring!

- Talented embedded product engineer?
- Had enough of the rat race?
- Keen to build stuff that matters?
- Want to be part of something special?

Join a small team to make a big impact. We turn ideas into products and no two weeks are the same. From our suite of Smart Parking devices to industrial power test rigs, you'll get the opportunity to apply every facet of your technical knowledge while still exercising your vision and sense of value.

Our speciality is the **Internet of Things** and **LPWANs**, from PCB design to cloud infrastructure. We believe in life-long learning and doing what you love.

**Full-time role in the heart of the Hunter Innovation Precinct,  
in the Eighteen04 incubator at Newcastle West.**

## Why work with us?

-  Flexible hours. No timesheets!
-  Brand new electronics workshop facility
-  On-site parking & nearby public transport
-  Fun community outreach programs
-  Never stop learning
