## Digital Multimeter

3-349-105-03

1/7.00

- Precision multimeter (V, A,  $\Omega$ , F, Hz, °C/°F)
- Resolution: 10  $\mu$ V, 10 nA, 10 m $\Omega$
- TRMS measurement for V AC and I AC up to 1 kHz
- Direct current measurement, or with transformer or current sensor with voltage output:
  - For measurement with current sensor:  
Transformation ratios ranging from 1:1 to 1:1000 can be taken into consideration for the display value
  - For measurement of current to 15 A:  
Resettable automatic circuit breaker  
– Indication of overload and blown fuse
- Temperature measurement with automatic Pt sensor recognition
- Automatic and manual measuring range selection
- Large digital display (20 mm) with additional analog scale
- Measured value storage and MIN-MAX recording
- DKD certificate, 3 year guarantee

QUALITY MANAGEMENT SYSTEM

DQS Certified per  
DIN EN ISO 9001 reg. no. 1262

Applied for

**DKD** Calibration Certificate

## Applications

The METRAport® 32S digital multimeter is suited for universal use in general electrical engineering, electronics and automotive service applications.

The tilting display allows for selection of the ideal reading angle, and the neck strap frees up both hands for measuring tasks. The instrument is switched off automatically when folded closed, and the display and control elements are protected against damage as well.

## Features

### TRMS Values for Distorted Waveshapes

The integrated TRMS value converter allows for TRMS measurement of periodic quantities (AC) regardless of waveshape.

### Automatic and Manual Measuring Range Selection

The desired measured quantity is selected with the rotary switch. The measuring range is automatically adapted to the measured value. The measuring range can also be manually selected with the help of the AUTO/MAN key.

### Automatic Storage of Measured Values \*

The DATA function allows for storage of the digitally displayed value to memory. A patented process assures that actual measured values rather than random values are saved, even with rapidly changing measured quantities. The saved value appears at the digital display. Indication of the current measured value continues at the analog display.

\* Patented

### Storage of MIN-MAX Values

In addition to displaying the current measured value, the minimum or the maximum value can be continuously updated and saved.

### Diode and Continuity Testing

Diode polarity can be tested, and electrical circuits can be checked for short-circuiting or interruption. Resistance values within a range of 0 to 10  $\Omega$  are displayed, and are signalled acoustically as well.

### Battery Saving Circuit

The instrument switches itself off automatically if the measured value remains unchanged for a period of approx. 10 minutes, and if none of the controls are activated during this time. Automatic shutdown can be disabled.

### Fuses

A resettable automatic circuit breaker (15A/240V AC /50V DC) is active in all current measuring ranges to protect against sudden overload due to incorrect connection to the mains, or short-circuiting at the measurement input:

Ranges to 30 mA	PTC and T2.5H250V with damping diodes
300 mA range	T2.5H250V slow-blow fuse and damping diodes
15 A range	resettable automatic circuit breaker

### Standard Equipment

- 1 multimeter
- 2 1.5 V batteries
- 1 T2.5H250V replacement fuse
- 1 KS17-2 measurement cable
- 1 carrying strap
- 1 operating instructions
- 1 condensed operating instructions
- 1 DKD certificate

### Electrical Safety

Safety Class	II per IEC 61010-1/EN 61010-1/ VDE 0411-1
Oversupply Category	II
Operating Voltage	300 V
Contamination Level	2
Test Voltage	2.3 kV~ per IEC 61010-1/EN 61010-1/ VDE 0411-1

### Electromagnetic Compatibility (EMC)

Interference Emission	EN 61326: 1997, class B
Interference Immunity	EN 61326: 1997/A1: 1998 IEC 61000-4-2: 1995/A1: 1998 8 kV atmospheric discharge 4 kV contact discharge IEC 61000-4-3: 1995/A1: 1998 3 V/m IEC 61000-4-4: 1995 1 kV

### Ambient Conditions

Operating Temp.	-10 °C ... +50 °C
Storage Temperature	-25 °C ... +70 °C (without batteries)
Relative Humidity	max. 75%, no condensation allowed
Climatic Category	3z/-10/50/75 % in compliance with VDI/VDE 3540
Elevation	to 2000 m
Deployment	indoors only

### Mechanical Design

Protection	housing: IP 40, connector jacks: IP 20
Dimensions	146 mm x 118 mm x 44 mm
Weight	approx. 450 gr. with batteries
